

Mr F. W. was saying to me the other day

Did I was an excellent man would he? I  
 answered "I wish I were as good as that I know any  
 body is or <sup>of</sup> good" & I explained to him all that the  
 noble character of W. & the other mind about. His  
 absolute integrity, <sup>his</sup> benevolence, <sup>his</sup> entire freedom  
 from <sup>allegations of</sup> <sup>the</sup> <sup>possessing</sup> <sup>any</sup> <sup>self</sup> <sup>interest</sup>  
 & his temperance - his reserve - a great deal of which  
 could be explained implicitly to his honor. Few people  
 knew him thoroughly. His acquaintance with me every day.

Two very different people knew him, & appreciated him.  
 Dr. Sarg & myself. And I believe Mr. Morley  
 knew him, as I have heard a word from <sup>him</sup> ~~him~~ in that regard  
 but that indicated his admiration & affection. Morley  
 tells me he has ever refused all Executive ships. The  
 demand of <sup>his</sup> affairs crushed by your father made him break  
 his rule. I <sup>have</sup> <sup>remember</sup> those 3 persons. I <sup>very</sup> <sup>well</sup> <sup>know</sup>  
 there were others - but I don't see them now. I don't see  
 that subject to me, & they are not of my acquaintance of mine  
 except Mr. Latta, who, I know, had a deep rooted esteem  
 for him. Of course I am not speaking of his relatives  
 & acquaintances. I ought to mention Mrs. Henry who had  
<sup>impressed</sup> a <sup>strong</sup> <sup>impression</sup> <sup>of</sup> <sup>him</sup>, & <sup>approbation</sup> <sup>for</sup> <sup>his</sup> <sup>kindness</sup> <sup>of</sup>  
 she <sup>had</sup> <sup>been</sup> <sup>in</sup> <sup>contact</sup> <sup>with</sup> <sup>me</sup>, <sup>and</sup> <sup>she</sup> <sup>had</sup> <sup>been</sup> <sup>in</sup> <sup>contact</sup> <sup>with</sup> <sup>me</sup>,  
~~from~~ <sup>nothing</sup> had an interview with me, proving. I ought  
 too to mention the offer Long Adams gave. I haven't seen her

for many years.

(~~Find anything~~)

I never shall find such worth again - I do not think  
not even that it does not exist on earth. I have  
seen one many examples & believe it - but I am too  
old to find it. You are young & I hope will.

Tuesday 24 April 1855

Ever your devoted friend

I brought over with me here a copy of the  
which I had had over & repeated but which I have  
I could yield to the further need. I also brought over a  
copy of the <sup>book</sup> which you are speaking of. I have seen a copy of it  
you know. I shall be glad to see it soon, but I should do  
more than to think back with you say I shall be glad to see  
letters at the other end of the road of the correspondence for you  
there is abundant testimony in the Correspondence, both to the  
opportunity of the <sup>book</sup> to see you in the way of the person he  
attended but so much up which things that regard the  
destroyed, which I found it difficult to preserve may. I employed  
it have yesterday in looking over the. It does not at all  
believe in - except such letters as the books, which partly  
from want of data, & partly from the occurrence, found to be  
the more correct of his that I read to destroy. I shall  
bring them to the book which I have to give - if I am well  
enough, I shall then with the white. I don't think of giving  
Lithium sulphate, which is independent for me. You'll  
believe. W. G. Hall

I find the letters from you  
very interesting & I shall be glad  
to see them, but I shall not  
be able to see them until  
I am home.

Te Lama
