

To Widow gentlew^o of Educ^r. The Guard^s of 2 young
Orphan children, a Boy & Girl, are desirous of placing
them under the entire care of a highly respectable Widow
Lady, who might be willing to devote herself to their
Management & education. An arrangement w^d

be made for their permanent establishment in the house
of such a Lady upon liberal, but not extravagant terms.

The Guardians hope to meet with an answer to their At-
tainment from one whose principles experience
temper & accomplishments, of lady-like habits might
render her acceptance of such a proposal an objection
inward unless it is held out a prospect of providing for the
Orphans a partial substitute for the tender care of a
mother which they have been deprived of. ~~See~~ New Times Oct 17 1822

At the proper age the two of all sorts w^d assist & a French
Nursery Governess w^d if approved, accompany the Children
for the present. The Boy would be removed to school at
a later in 5 years. The girl might remain till she were
her own mistress. The West end of London, or the vicinity of London
(w^d be preferred) is indispensable. Letters, containing
either full particulars, or such only as the writer may
be willing to disclose in the first instance to a stranger, will
be punctually answered - Please to address post paid, to M. M.
